LOOKING UP in 2021!

Our Doc's on the clock in the South Pole!

Grab a world map and look up to the South ...further up...nope, even further...when you reach **ANTARCTICA** you've hit the spot!

As per our December issue, our very own **Dr Brett Williams** is on an icy adventure in the South Pole.

He is part of a team conducting scientific experiments around climate change and space weather monitoring aboard the **SA AGULHAS II** and at the **SANAE BASE IV**.

Following a wild journey fraught with 50 knot winds, Doc's latest message reads, **"Happy New Year to all of you from the cold Southern ocean...I have arrived at the ice shelf...and will fly to SANAE in the next few days."**

Watch this space for updates on this epic adventure!

Starting the year on a HIGH note? Do it safely!

Falls from height are one of the most frequent causes of workplace fatalities.

Some basic guidelines for safety while “Working at Height”:

Wherever possible, use an **existing place of work** that is already safe, e.g. a non-fragile roof with a permanent perimeter guardrail

Use **collective protection work equipment** to prevent people from falling, e.g. mobile elevating work platforms (MEWPs) such as scissor lifts and tower scaffolds

Use a **work restraint** (travel restriction) system that prevents a worker getting into a fall position

Contact SAFETECH to assist you with
risk assessment and safety protocols
for work at height

Safetrain cc t/a Safetech is a SANAS Accredited Inspection Body, No. OH 0049. Refer to www.sanas.co.za for Directory Accredited Facilities
Inspection Bodies for schedule of accreditation.
