

COMPANY PROFILE

Partnering with our clients for a safer tomorrow...

SAFETECH provides Occupational and Environmental Health and Safety solutions in Southern Africa and SADC Regions. The need for general Environment and Health and Safety (EHS) consulting is a continuously growing field. As a result we assist clients through management system implementation, monitoring and measurement services and training to meet their legal, moral and commercial requirements.

Safetech's consultants have experience in multiple industry sectors.

BACKGROUND

Safetech was established in 1992. We have offices in the North, servicing Gauteng and surrounding areas, and a Southern office, servicing the Cape and Coastal Regions.

VISION

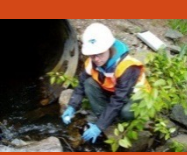

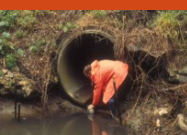

To achieve international recognition as a reputable supplier of consulting services in the area of Occupational Health, Safety and Environmental challenges.

VALUES

- * Building long-term **Relationships** with clients that improve health and safety within the workplace and environment
- * **Integrity** that ensures that all relationships with our clients and their employees are conducted in an honest manner
- * **Accurate and Reliable Testing** that includes measuring stressors and reporting the results that are meaningful to our clients, in order to improve the workplace and general environment
- * **Training** of staff and management on Health, Safety and Environmental legislature and best practices in the workplace
